

Flood Risk Management Strategy 2017 to 2023

Helping residents and businesses to reduce flood risk

The strategy improves our knowledge and understanding of the flood risks for the borough

- We will work with our partners to improve our understanding of the flood risks for the borough.
- We will work with our partners to improve our understanding of the flood risks for the borough.
- We will work with our partners to improve our understanding of the flood risks for the borough.
- We will work with our partners to improve our understanding of the flood risks for the borough.
- We will work with our partners to improve our understanding of the flood risks for the borough.

What will we do?

- Provide information to help residents and businesses understand their flood risk.
- Take action to reduce flood risk, such as installing flood barriers and raising ground levels.
- Work with our partners to improve our understanding of the flood risks for the borough.

How will this affect you?

- If you live in a flood risk area, you will be able to access information and advice to help you reduce your flood risk.
- If you live in a flood risk area, you will be able to access information and advice to help you reduce your flood risk.
- If you live in a flood risk area, you will be able to access information and advice to help you reduce your flood risk.
- If you live in a flood risk area, you will be able to access information and advice to help you reduce your flood risk.
- If you live in a flood risk area, you will be able to access information and advice to help you reduce your flood risk.

What can you do?

- Know your flood risk and what to do if you are flooded.
- Check your insurance policy to see what it covers.
- Develop a flood plan for your home or business.
- If you live in a flood risk area, you will be able to access information and advice to help you reduce your flood risk.
